

Clemson Formula SAE 2009 Adopt-a-CC Program

The 2009 Clemson Formula SAE Team is a group of self-motivated students working together to design fabricate and campaign an open wheel racecar in an international collegiate competition. In order for the team to successfully continue its "Winning Tradition", support from businesses as well as individuals is essential. In an effort to raise the needed funds to purchase a 600cc Honda F4i motor, the Adopt-a-CC program was created a few years ago. For a \$5 donation, an individual may adopt one or more CC's, representing a cubic centimeter of displacement of the engine. By reaching the goal of 600 CC's, the team will have raised the \$3,000 needed to purchase the much-needed motor. All team members are required to raise 100CC, or \$500, in order to go to competition.

***All Donations are tax-deductible!**

I, _____, am a supporter of the 2009 Clemson Formula SAE Team. I would like to help the team reach their goal of continuing Clemson's "Winning Tradition" at the Formula SAE competitions in Michigan and California.

I am pledging \$ _____ to adopt CCs (\$5 per CC) to help the team reach their goal of 600 CCs.
